

# Cath Kidston

Client: Knight Harwood

In the run up to the grand opening of the Lexicon Shopping centre in Bracknell, Mectric Solutions Ltd was contracted to carry out mechanical and electrical works in many of the new commercial units. Largest among these projects was the latest branch of Cath Kidston.

Our remit included air conditioning & ventilation works, and the installation of a fire alarm, power and lighting to the store. Our high-quality workmanship and ability to complete within a tight timeframe contributed to the store looking good and being ready to open its doors to the public on schedule. Now, customers are able to peruse goods highlighted by diffused spotlights, while state of the art air conditioning keeps the environment.
